Innovative AI Solutions Developer & Entrepreneur

Results-driven technology entrepreneur and senior machine learning architect with 20+ years of enterprise experience. Currently leading cutting-edge ML initiatives at Lowe's while simultaneously building 10 comprehensive AI-powered platforms across legal, hospitality, financial, trading, government contracting, cybersecurity, and business management sectors. Expert in democratizing AI technology for SMBs through accessible, secure, and scalable solutions.

Entrepreneurial AI Platform Portfolio

Founder & Lead Developer | 10 AI-Powered Platforms | Ongoing

Successfully launched a comprehensive ecosystem of AI-powered business platforms demonstrating exceptional entrepreneurial vision and technical execution across multiple industries.

Legal Technology & Document Processing

- <https://legalaiforms.com> - AI-powered legal document generation covering business formation, real estate, family law, and estate planning with secure authentication and multi-format downloads
- <https://norshin.com> (PDFGenius) - Advanced PDF data extraction achieving 99% accuracy using proprietary Vision AI for enterprise document processing. Richmond, VA headquarters with professional support infrastructure

Food Service & Hospitality

- <https://orderlybite.com> - Revolutionary multi-channel ordering platform featuring SMS, phone ordering, and voice call integration with AI-powered menu optimization
- <https://elitepos.chat> - Comprehensive restaurant POS solution with inventory management, KOT systems, multi-location support, and real-time analytics

Government Contracting & Financial Intelligence

- <https://contracts.orderlybite.com> - Government contract management platform with AI-powered contract analysis and automated RFP/RFI generation targeting specialized B2G market
- <https://cashflowapp.app> - Financial management application providing real-time cash flow forecasting, predictive algorithms, and business intelligence with mobile-first design

Cybersecurity & Security Intelligence

- <https://security.orderlybite.com> - Comprehensive AI-powered cybersecurity platform featuring incident management, threat intelligence, and compliance monitoring with SOAR integration, visual workflow builder, and MITRE ATT&CK Framework. Supports GDPR, ISO 27001, NIST, PCI DSS, HIPAA, and SOX compliance with microservices architecture

Financial Trading & Investment

- <https://stockstrategy.info> - AI Trading Platform with portfolio management tracking \$150,000+ assets, multi-timeframe performance analytics, and real-time market analysis with professional trading interface

Business Process Automation & AI Services

- <https://omniassistai.com> - Virtual assistant services platform for startups and SMBs providing admin, marketing, and web task automation
- <https://serviqai.com> - AI-powered service solutions platform with versatile

architecture adaptable to diverse industry requirements

Technical Architecture Excellence

Core Innovation Framework:

- AI Integration: Vision AI, contract analysis, menu optimization, predictive analytics, trading algorithms, cybersecurity threat detection, and workflow automation
- Multi-Channel Systems: SMS, voice call, web interfaces with secure authentication and user management across all platforms
- Scalable Infrastructure: Cloud-based architecture supporting multi-location, high-volume processing with real-time analytics dashboards
- Enterprise Security: SOAR platforms, MITRE ATT&CK integration, multi-framework compliance automation

Market Strategy:

- Industry Diversification: Legal, hospitality, government, financial, trading, cybersecurity, and business automation sectors
- SMB Focus: Making enterprise-grade AI accessible to smaller businesses with professional operations and Richmond, VA presence
- Technology Leadership: Integrating emerging AI capabilities into practical business solutions with GitHub portfolio demonstrating full-stack expertise

Key Achievements Summary

- 10 AI-powered platforms built and deployed with professional operations and active user bases
- Enterprise cybersecurity platform with automated security workflows, SOAR integration, and multi-framework compliance monitoring
- 99% accuracy achieved in PDF data extraction using proprietary Vision AI algorithms
- \$150,000+ portfolio management through comprehensive AI trading platform
- 20+ years enterprise experience with Fortune 500 companies (Lowe's, Capital One, Cisco)
- PhD in Computer Science with pioneering work in distributed computing portals

Core Technical Competencies

AI & Machine Learning: ML Transformer Models, Vision AI, Generative AI, Neural Networks, Deep Learning, Document Processing, Predictive Analytics, Cybersecurity AI, Security Orchestration

Programming & Development: Java, JavaScript, Python, Scala, Spring/Spring Boot, Angular, NodeJS, Apache Beam

Big Data & Cloud: Apache Spark, Hadoop, Solr, Elasticsearch, Google Cloud, Terraform, MongoDB, PostgreSQL

Enterprise Systems: Microservices, API Development, DevOps, CI/CD, Authentication, SSL, SIEM integration

Industry Expertise: E-commerce, Financial Trading, Government Contracting, Cybersecurity, Legal Technology, Blockchain

Education & Certifications

PhD, IDE for Grid Computing | Syracuse University | 1994-1999 | GPA: 3.8

MS, Computer Science | Syracuse University | 1994-1996 | GPA: 3.7

MS, Computer Engineering | Istanbul Technical University | 1991-1993 | GPA: 3.5

BS, Computer Engineering | Ege University | 1986-1991 | GPA: 3.0

Recent ML Certifications: Neural Networks and Deep Learning, Advanced Learning Algorithms, Unsupervised Learning (Coursera, 2022)

Professional Experience

Lead Machine Learning Architect

Lowe's Companies, Inc. | Charlotte, NC (Remote) | Jan 2024 - Present

- Developing advanced system to curate and select optimal images from vast databases using state-of-the-art ML transformer models for enhanced product displays and user engagement
- Leading Project Quota Assistance system powered by Generative AI to provide immediate, accurate answers for resource allocation optimization and project management efficiency
- Architecting enterprise-scale ML solutions that directly impact customer experience and operational efficiency

Principal Software Engineer

Lowe's Companies, Inc. | Mooresville, NC | Oct 2020 - Present

- Design and build critical features for Lowe's.com including workflow applications for Apache Beam data pipelines and Elastic Search frameworks
- Engineered pivotal e-commerce features including free delivery, expedited delivery, and promotions through end-to-end software lifecycle management and Spark application development
- Reduced client costs significantly while elevating feature quality through automated build processes optimizing long-term maintenance
- Spearheaded project roadmaps serving as single-threaded leader between senior VPs and engineering teams, prioritizing end-user impact while maintaining regulatory compliance
- Enhanced cloud-based search experience with near-real-time indexing and product ingestion processes using Couch Base and Solr

Senior Software Architect

Wipro Limited | Richmond, VA | May 2018 - Oct 2020

- Architected products on Solr for blockchain and cryptocurrency customers, creating groundbreaking features including profit sharing with nominal interest fees and security schemas for borrowed tokens
- Reduced product indexing time by 9x (from 360 to 40 minutes for 5 million products) through ETL process optimization using Scala, Spark, Couchbase, and Solr
- Constructed Lowe's enterprise search infrastructure on Google Cloud using Terraform, Packer, Ansible, and Jenkins for automated deployment
- Developed expertise in blockchain technologies including NextJS Web Frontend, Web3, Remix, and Solidity

Master Software Engineer

Capital One | Richmond, VA | Aug 2016 - Dec 2017

- Led design of data flows and sandbox environments for API development and service virtualization frameworks
- Overhauled developer.capitalone.com website leading team efforts using Protractor, Cucumber, Spring Framework, NodeJS, JavaScript, Express, and AngularJS
- Produced fully automated API testing without user input via MVC, Swagger, FSM, and Graph Computing
- Enhanced multiple web features presented in company-wide meetings

Senior Software Developer

pExchange | Richmond, VA | Dec 2017 - Mar 2018

- Designed user management system for presidential budget preparation using Spring Boot, MongoDB, Angular, and Apache Shiro for user roles and permissions

- Augmented team productivity by assessing and implementing standard software toolsets

Software Engineer

Cisco Systems | Richmond, VA | Nov 1999 - Jul 2007

- Worked on unified communications software contributing to enterprise communication solutions

Senior Software Analyst/Technical Lead

Ferguson Enterprises | Jul 2007 - Jul 2016

- Led multiple web development projects for enterprise-level solutions

Independent Software Consultant

Self Employed | Sep 2003 - Aug 2017 (14 years)

- Built complete Turkish search engine for food retail chain using big data pipelines, Apache Nutch/SOLR/Hadoop/Node.js/Bootstrap with 15 ranking criteria
- Achieved 99.5% extraction success rate implementing rule extraction in XQUERY for 700K lines of COBOL code (237 files)
- Renovated government websites using Angular and NodeJS, leading entire software development lifecycle
- Developed SOA Router/Proxy using .NET technologies for secure intra-company web services
- Created Oracle WCI API for Navy portal systems with automated portal execution

Complete Platform Portfolio Summary

10 Comprehensive AI-Powered Platforms:

1. <https://legalaiforms.com> - AI legal document generation (secure access)
2. <https://norshin.com> - Advanced PDF processing with 99% accuracy
3. <https://orderlybite.com> - Multi-channel food ordering with SMS/phone
4. <https://contracts.orderlybite.com> - Government contract management
5. <https://elitepos.chat> - Restaurant POS solution (secure access)
6. <https://cashflowapp.app> - Financial management and forecasting
7. <https://omniassistai.com> - Virtual assistant services
8. <https://serviqai.com> - AI-powered service solutions
9. <https://stockstrategy.info> - AI trading platform with portfolio management (secure access)
10. <https://security.orderlybite.com> - AI-powered cybersecurity platform with SOAR integration
